Phone: +65 98592186

- **MGX Global Group:**

- Focus on integrated green high-tech parks, including data centres and solar farms.
- Involvement in Cybersecurity solutions, M2M protocol and AI-driven services.
- Emphasis on ESG and sustainable clean energy solutions.
- Project development and management expertise.

- **Xpertasia:**

- Focus on Cybersecurity Consultancy in both Defensive and Offensive applications and competition.
- Expertise in Cybersecurity services and certification, infosec competency development and assessment acceleration and audit.
- Jumpstart VISO programs, SOC Services , Cybersecurity Consultancy, Business Value Coaching and Partner Development Services.
- XPERTASIA Global can expand its market reach by partnering with MGX on large-scale green tech park and data centre projects.

This strategic partnership framework include:

- **Joint Go-to-Market Strategy:** Develop joint marketing and sales initiatives to promote integrated solutions.
- **Service Level Agreements (SLAs):** Define clear roles, responsibilities, and service levels for cybersecurity services.
- **Technology Integration:** Explore opportunities to integrate Xpertasia' s security solutions into MGX's infrastructure and platforms.
- **Innovation Collaboration:** Collaborate on research and development to address emerging cybersecurity challenges in green tech and IoT.

Opportunities;

1. **Cybersecurity for Green Tech Parks & Data Centers:**

- MGX is developing green tech parks with data centres. These facilities require robust cybersecurity to protect sensitive data and infrastructure.
- Xpertasia can provide cybersecurity consulting, solutions, and services to secure these parks and data centres, including:
 - Security assessments and penetration testing
 - Security architecture design and implementation
 - Threat detection and incident response
 - Data protection and privacy solutions
 - Compliance and regulatory consulting
- This synergy ensures MGX's developments are secure by design, enhancing their value proposition.

2. **IoT Security Solutions:**

- MGX is involved in M2M protocol and AI-driven services, which likely involve IoT applications.
- Xpertasia can offer specialized IoT security services to address the unique challenges of securing connected devices and networks:
 - IoT security assessments and vulnerability management
 - Secure device provisioning and management
 - Network security for IoT deployments
 - Data security and privacy in IoT ecosystems
- This collaboration can help MGX deliver secure and reliable IoT solutions within its projects.

3. **Integrated Security Offerings:**

- Combining MGX's infrastructure and project development with Xpertasia's cybersecurity expertise allows for integrated solutions.
- They can jointly offer clients comprehensive packages that include:
 - Secure-by-design data centre development
 - Secure IoT implementations for smart park initiatives
 - Managed security services for ongoing protection

4. Market Expansion:

- MGX can leverage Xpertasia' s cybersecurity expertise to enhance its offerings and attract clients who prioritize security.
